

As an Employer during this unprecedented time, you must now navigate a deluge of often-conflicting information to determine how to continue essential operations and re-open fully. You face the risky prospect of returning an employee who might cause others at work to become sick. While no medical risk can be entirely eliminated, you can demonstrate your efforts to comply with governmental recommendations and protect your workers by having each of them screened for both the virus and its antibodies. **Our approach is the only one to discern not only currently active cases, but those with recent or remote antibodies that indicate some measure of protection.** Using all this information, you can determine the best course for each employee to protect them, your workforce, and yourself.

We offer two packages and all the information you need to make the best decision for your business. We recommend a full Covid-19 Fit for Duty evaluation (on the left), or you can opt for determining current infections only with a Covid-19 Virus Test (on the right). We also offer customized solutions for large business. **Call now: 516-935-8747 or Fill out our Website Form**
